Course Overview

The **Qualsafe Level 5 Diploma in First Response Emergency and Urgent Care (RQF)**

has been specifically designed to enable learners to attain comprehensive factual and theoretical knowledge in broad contexts in out-of-hospital emergency and urgent care. Learners will have the opportunity to attain and develop clinical skills whilst being guided by standard operating procedures, protocols and systems of work.

Learners will attain non-technical skills to make judgements and plan activities which could contribute to service development and practice placement education activities.

The qualification is designed to act as proof the Learner has undergone a programme of learning and assessment to demonstrate knowledge, understanding, behaviours and skills competencies in the out-of-hospital emergency and urgent care environment.

*158 delivery and assessment hours.
750 clinical practice placement hours.*
