To: timm ronin <[redacted]>

Dear all,

As my time on the frontline as a Paramedic comes to a close I feel the need to say thank you to those that trained me. The NHS trained me as a Medical Technician but Ronin took me to the next level as a Paramedic, and little was I to know how high that level would be in both skills and mind set. I'm now a self employed Clinical Advisor earning sometimes up to £1000 per shift and it is true to say Ronin have been the architect of my success. I know many people over estimate their success but those that know me will also know that integrity is paramount to me, and Ronins integrity is no less if not more. The trainers who pushed and made life seem at the time very hard for me, don't truly know how successful they all were so this e-mail truly comes from my heart. Timm Mel Alan Jammie and all the crew at Ronin I salute you all. I want you all to know that you changed my chances and opportunity in life the day I met you all in Houts Bay. For those who are thinking of taking the plunge to Ronins I can only say this "what you have inside of you now, will be enriched, it will be pushed to the limits, and you will be far far more the total sum than what you presently are"

In closing this e-mail I want you all to know I'm so so glad you trained me, but more proud that I'm able to call you all my distant friends.

Stand down Ronin Job well done !!!
thank you for everything.

George McCarthy (Derek)
NHS Paramedic
NHS Clinical Advisor
