Dear Timm

Hope all is well in South Africa with you and your family.

I want to congratulate you on your newly established satellite training site in Sweden. It has been 10 years, almost to the date, since I graduated my medical course which kickstarted my career in pre-hospital and emergency medicine. I am now working as a specialist paramedic on a critical care fast response unit in Sweden. Since the Danish paramedic education is not university based I have completed a BSc (Hons) in Pre-Hospital Emergency Care from Coventry University and am currently undertaking a masters in health research at the University of Stirling and am currently attached to our research department. I have also had the privilege of teaching the Danish Defence medics and am currently teaching the Danish police in tactical medicine.

All this started 10 years ago in Cape Town and I have often used the skills and the knowledge that were forced into my head and hands during those intense 2 months. Many times I have appreciated that special time in Cape Town and though it was a struggle to keep up, greatful thoughts have often been sent towards you, Mel and the other instructors.

I now live in Helsingborg which is about an hour's drive from Helsingborg. If you are in need of a paramedic to teach your future students in their medical assistant module of the close protection course, it would be an honour and a privilege for me to go back to where it all started and pass on skills and knowledge in the same spirit it was delivered to me 10 years ago. To pass on the legacy to the future Ronin graduates.

Kind regards

Rasmus
